

Load rating of cabinet "U" handles / Tubular handles in metal

sorted by ascending standard numbers

Extensive test series were carried out with the cabinet "U" handles / tubular handles listed below.

The handles were slowly loaded and relieved at room temperature with incrementally increasing force. After load relieve, a deformation irrelevant in terms of function and appearance remained at the listed values for L_1 and L_2 respectively. The tensile strengths were in most cases multiples above the specified value.

Note:

The details given on load rating are non-binding guide values without any liability. In general, they do not constitute a warranty of quality.

The user must determine from case to case if a product is suitable for the envisaged use. Ambient factors and ageing may influence the specified values.

Load capacity L_1 in N

Load capacity L_2 in N
